„One health“ – the belief that on earth, human, animal and environmental health are intertwined – has been brought into the focus of many due to the appearance of the new coronavirus. We are inviting speakers with a religious background, as well as members of civil society organizations from Germany and from China to share their perspectives on this topic. How has the pandemic led to a rethinking of values? How does this impact our behaviour? Join us in a discussion on this during our webinar. For those who want to delve deeper into the topic we are offering the opportunity to join the subsequent workshop at the Missionsakademie in Hamburg (number of participant spots is limited).

A joint event organized by Mission Academy in Hamburg, the China-Program of Stiftung Asienhaus and the China Info Desk.

Diese Tagung wird vom Evangelischen Missionswerk in Deutschland (EMW) aus den Mitteln des Kirchlichen Entwicklungsdienstes gefördert.
